PROFILE

Dentist with extensive background and experience in **full-mouth comprehensive treatment** through a multi-disciplinary approach.

Since my graduation I have worked part-time while studying several postgraduate programs in different specialties. From 2017 to 2020 I have lived in the USA enrolled in a program in surgical and restorative aspects of **Implant Dentistry**.

I have a clear and logical mind with a very practical vision to **solve problems**. I am self-sufficient when making decisions, even though I work perfectly as a part of a team, and also under pressure.

I like **proper-done work**, I am **reliable**, **responsible and above all, ethical**. I am very hard-working as well as motivated to continue growing as a professional.

I am looking for the opportunity to work in the fields of **Aesthetics**, surgery and the restorative aspect of **Implant Dentistry**, although I have enough knowledge and skills to diagnose and treat cases of restorative dentistry and endodontics.

+ SKILLS
